PROFESSIONAL SUMMARY

Computer Science undergraduate with a strong foundation in Data Structures & Algorithms and hands-on experience in full-stack application development. Passionate about solving real-world problems by building scalable, efficient, and user-centric software solutions. Seeking opportunities to contribute, learn, and grow as a software engineer in a collaborative engineering environment.

EDUCATION

B.Tech in Electronics and Computer Science Engineering

Shri Ramdeobaba College of Engineering & Management

CGPA: 9.03

Aug 2023 – Present

Nagpur, MH

EXPERIENCE

Research Intern

Ramdeobaba University (RBU)

June 2026 – Present

Nagpur, India

- Developed a full-stack **Node.js** and **React** web application to automate attendance auditing and detention report generation, reducing an estimated multi-hour manual process to under 2 minutes.
- Built a **SheetJS**-based Excel parser to normalize inconsistent LMS exports — handling multi-line records, embedded percentage strings, and transfer-student edge cases — feeding a rules engine for attendance classification.
- Implemented automated **.docx** report generation using the programmatic **docx** Node.js library and a React frontend featuring drag-and-drop uploads, real-time statistics, and one-click downloads.

TECHNICAL SKILLS

- Programming Languages:** Java, C, Python
- Frontend:** HTML, CSS, JavaScript, React.js, Tailwind CSS
- Backend:** Node.js, Express.js, Socket.io, REST APIs, JWT Authentication, Server-Sent Events (SSE)
- Databases:** MongoDB, SQL, Supabase
- Core Concepts:** Data Structures and Algorithms, Object-Oriented Programming
- Tools & Platforms:** Git, GitHub, Postman, VS Code, Render, Vercel

PROJECTS

CodeInsight — AI Code Reviewer & Execution Visualizer

[GitHub](#) | [Live App](#)

React, Node.js, Express.js, Groq API, Monaco Editor, Mermaid.js

- Built a full-stack AI code review platform (**Java, Python, JavaScript, C, C++**) with automatic language detection and real-time AI feedback via **SSE**.
- Integrated **Monaco Editor** diagnostics with **Mermaid.js** execution flowcharts and step-by-step execution simulations from source code.
- Implemented AI-based issue detection for **bugs, logic flaws, performance bottlenecks, and security vulnerabilities**.

SyncNode — Real-Time Chat Application

[GitHub](#) | [Live App](#)

React, Node.js, Express.js, MongoDB, Socket.io, JWT, Zustand

- Built a full-stack messaging platform with **instant chat, online presence tracking, image sharing, and JWT authentication**.
- Implemented protected REST APIs, session management, and **Socket.io** for low-latency communication.
- Built a responsive UI with **Tailwind CSS, DaisyUI**, and **Zustand** state management.
